

Guide to your new bill

This is an example only and does not reflect actual rates!

- 1** Your ICP number. This is a unique number that identifies your property on the electricity network. Just so you know, it stands for 'Installation Control Point'.
- 2** Your usage charge. We show this as **cents per kilowatt hour (c/kWh)**. You will have separate usage charges for each component of your meter set-up e.g. Controlled, Uncontrolled. This isn't a new charge, it just used to be bundled up in the old unit rate.
- 3** Your meter set up. For example, Controlled or Uncontrolled.
- 4** Your fixed daily charge. This isn't a new charge, it just used to be bundled up inside the old unit rate.
